Over 9 years of software development experience, I have been involved in the full software application development flow, as well as migrations and reverse engineering with a 90% success rate. I have been a technical leader in back end and front end teams.

PROFESSIONAL EXPERIENCE

Scotiabank

Java Application Specialist

San José, Costa Rica

November 2020 – Present

- Develop different web applications for Leasing, Insurance, Trusts and Foreclosed Assets businesses.
- Implement improvements in development deliveries to streamline administrative processes and reduce errors in them.
- Lead the development of new components that enable users to significantly reduce handling times by up to 70%.
- Build and design a tool to create dynamic legal contracts by banking sectors, allowing administrative times to be reduced by up to 200% more efficiently.
- I provided pioneering solutions on how to use artificial intelligence tools to speed up the development of tasks and requirements faster without losing the quality of deliveries.
